SCC Display Division

SCC Display Division offers cutting-edge retail displays & store fixtures. Our counter-displays, end-caps, towers, and cases can be seen in big box retailers, department stores, food & drug chains as well as boutiques throughout the United States, Canada and China.

Conceptual Design

Our talented designers offer AutoCAD detailing, Pro-E 3D Color Rendering while our engineering team will value engineer the complete fabrication process resulting in an eye-catching, cost-effective prototype.

State-Of-The-Art Production

Our highly automated Computer Numerically Controlled (CNC) table routers, panel saws, laser cutting equipment and suction-based material handling equipment keeps our facility operating at the highest performance levels the industry has to offer.

Our in-house paint booth and graphic vinyl plotters make for quick and cost-effective means of custom color and graphics when required. SCC Display works hand-in-hand with SCC (packaging division) for all silk screening and digital printing requirements.

Materials & Services

SCC Display offers wood fabrication and finishing, metal manufacturing, plastic fabrication and molding, injection molding (SCC), vacuum forming, lenticular printing (SCC), digital and inkjet printing (SCC) and a plethora of other display and signage products.

SCC Display specializes in program roll-outs and promotions, but will also supply single unit orders as well.

Locations

SCC Display's main plant is located Fullerton, CA, USA with two additional plants located in Ontario, Canada and Shanghai, China.
